International news on the tank storage and logistics industries

Oiltanking Antwerp Gas Terminal expansion

Oiltanking Antwerp Gas Terminal (OTAGT) already is a long-term logistics partner of Borealis, a leading provider of innovative solutions in the fields of polyolefins, base chemicals and fertilisers. As part of the agreement, OTAGT expands its partnership for handling and storing more propylene and propane, further strengthening its position as an integrated partner of the petrochemical industry.

OTAGT will build a new 135,000 cbm propane storage tank to supply the Borealis production facility in Kallo, Belgium. Borealis will construct a new world-scale propane dehydrogenation (PDH) plant in addition to its existing facilities in Kallo. The final investment decision was recently taken following the successful completion of the Pre-Front-End Engineering Design (FEED) study. Commissioning of the new PDH plant is scheduled for the beginning of 2022.

OTAGT's successful development thus continues. Only two years ago, in mid-2016, Oiltanking acquired the Antwerp Gas Terminal, and accelerated working on the enormous expansion potential. In early 2017, a contract was signed for the construction of a 135,000 cbm fully refrigerated butane tank that will go into operation in 2019. Together with the newly planned propane tank, OTAGT will have almost tripled its current capacity. **For more information visit: www.oiltanking.com**

COMPOSITE REPAIR SPECIALIST

TANK REPAIR & LEAK SEALING

2 composite repair systems for damaged tank & vessel

TANKiT® & REINFORCEKIT® PATCH

EMERGENCY REPAIR
Ready-to-use kit
1 TANKiT® = 1 repair

PERMANENT REPAIR
Compliant with ISO 24.817 & ASME PCC-2
Tailor made for each repair

Suitable for various tank designs and sizes

PIPE REPAIR - ONSHORE & SUBSEA

REINFORCEKIT® 4D

ONLINE LEAK SEALING

STOPKIT®

PIPE & SUPPORT PROTECTION

ROLLERKIT®

STEEL BEAM REPAIR & PROTECTION

REINFORCEKIT® BEAM & DKIT®
